

## Fuel Supply for Yamama New Project (YNP)

## PROJECT OVERVIEW

- The new cement plant or Yamama New Plant (YNP) comprises of two (2) production lines with a total throughput capacity of 20,000 clinker ton/day.
- Supply of Sales Gas for the Start up of Line-1 will be March 15, 2019
  - Fuel Allocation
    - 80 MMSCFD based on 1080 BTU/SCF of Sales Gas
- 20 KM of new pipelines from Saudi Aramco's existing headers located at KM 41.
  - Sales Gas Pipeline – 16"Ø, Cold Tie-In from existing 20" Valve at EWRGD-1 P/L (48")

### 1. Launcher Area:

Cold Tie-In @ EWRGD-1 KM-41, Associated Piping, ZV, RTU and Communication Shelter, Scraper Launcher Station, Burn Pit, Lateral Pipeline and Holding Tank.

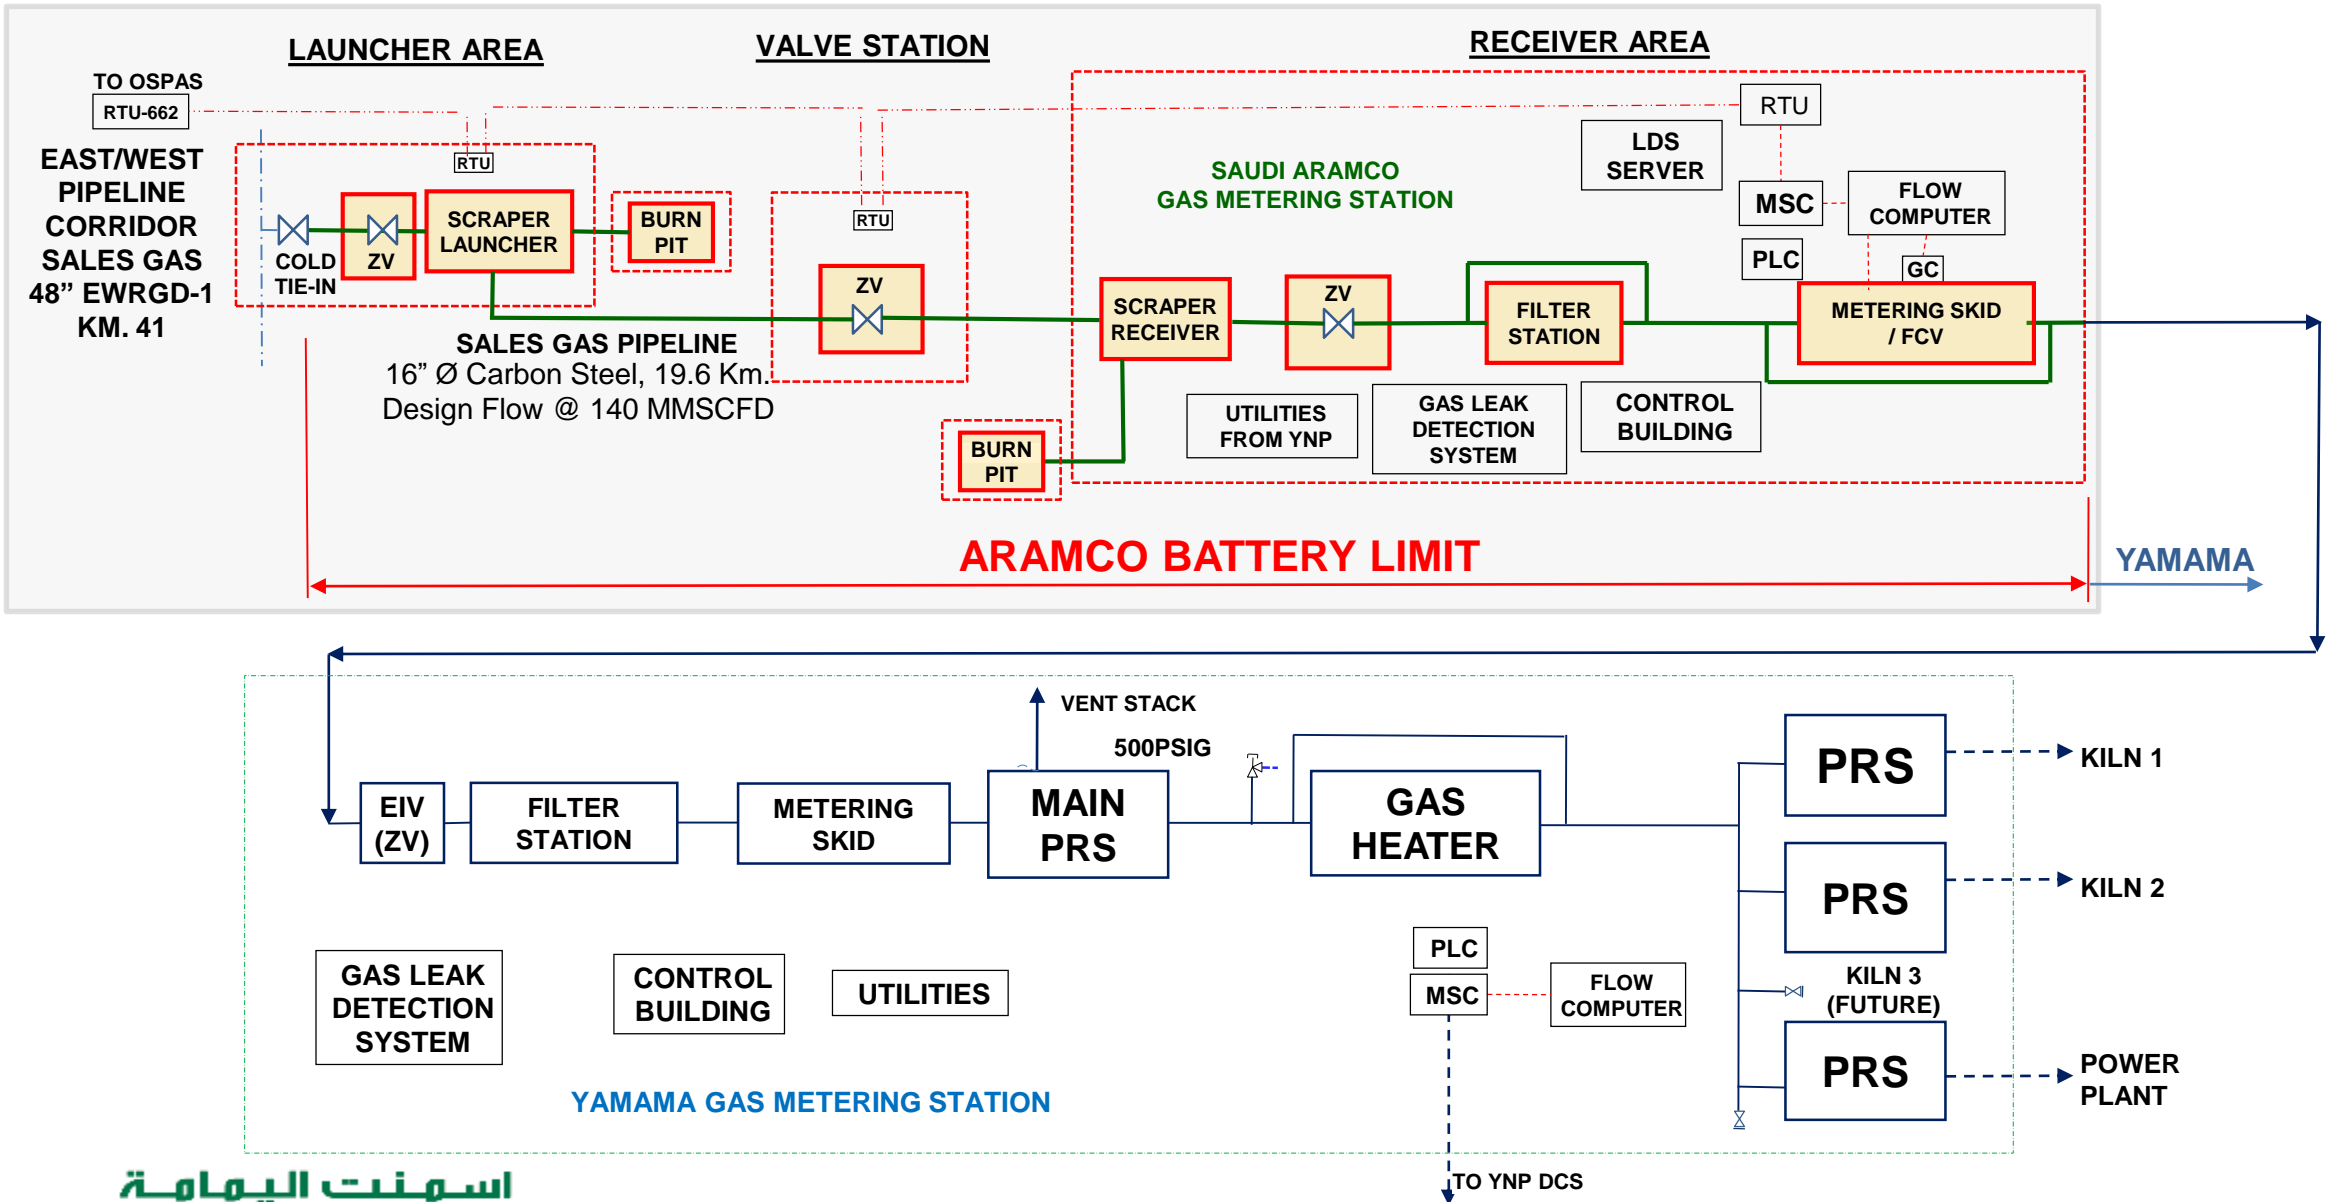

### 2. Valve Station:

ZV, Common RTU and Communication Shelter.

### 3. Receiver Area:

Scraper Receiver Station, ZV, Filtration System, Metering System, Control Building, Burn Pit, LDS Server
